

Cullinan Oncology Forms Strategic Collaboration Agreement with Mount Sinai to Advance Oral HPK1 Protein Degradator for Cancer Treatment

January 10, 2022

Collaboration to identify and advance best-in-class HPK1 protein degraders

Exclusive option for Cullinan to license related intellectual property from the collaboration

CAMBRIDGE, Mass., Jan. 10, 2022 (GLOBE NEWSWIRE) -- [Cullinan Oncology, Inc.](#) (NASDAQ: CGEM) ("Cullinan"), a biopharmaceutical company focused on developing a diversified pipeline of targeted therapies for cancer patients, today announced the Company has entered into a collaboration agreement with the Icahn School of Medicine at Mount Sinai ("Icahn Mount Sinai") to develop novel small molecule immune modulators.

This exclusive option and multi-year collaboration agreement will be focused on the optimization and development of oral protein degraders targeting hematopoietic progenitor kinase 1 (HPK1), a key regulator of immune cell activation and a high-priority target in immune-oncology. The collaboration aims to accelerate the development of novel, best-in-class HPK1 degraders that stimulate robust anti-tumor immunity. The research will be conducted by leading scientists at both Cullinan and Icahn Mount Sinai. Cullinan will fund the collaboration and has an exclusive option to license the intellectual property for further development and commercialization.

The Icahn Mount Sinai team will be co-led by Steven J. Burakoff, M.D., Lillian and Henry M. Stratton Professor of Cancer Medicine, Dean for Cancer Innovation, and Chief, Pediatric Oncology at Icahn Mount Sinai, and Jian Jin, Ph.D., Mount Sinai Professor in Therapeutics Discovery and Director, Mount Sinai Center for Therapeutics Discovery, at Icahn Mount Sinai.

"Our team is excited to work with the talented and experienced cancer drug developers at Cullinan," said Dr. Jin. "Our research has already demonstrated that a degrader approach to targeting HPK1 may control tumor growth more effectively compared to simply inhibiting HPK1 kinase activity. We believe this collaboration will help us identify novel, differentiated oral HPK1 degraders and can bring future benefit to cancer patients worldwide."

"We are proud to partner with Icahn Mount Sinai, which is at the forefront of cancer research and patient care," said Leigh Zewel, Chief Scientific Officer, Small Molecules, of Cullinan Oncology. "We are very excited to build on the synergy between the deep scientific expertise of the Icahn Mount Sinai team and the strong drug development capabilities at Cullinan to advance therapies that have the potential to significantly improve the lives of patients with cancer. We look forward to a fruitful collaboration in this novel area of science."

About Cullinan Oncology

Cullinan Oncology is a biopharmaceutical company that is developing a diversified pipeline of targeted therapeutic candidates across multiple modalities in order to bring important medicines to cancer patients. The Company's strategy is to source innovation through both internal discovery efforts and external collaborations, focusing on advanced stage assets with novel technology platforms and differentiated mechanisms. Forward-Looking Statements

This press release contains forward-looking statements of Cullinan Oncology, Inc. ("Cullinan," "we" or "our") within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements include, but are not limited to, express or implied statements regarding Cullinan's beliefs and expectations regarding our preclinical and clinical development plans, clinical trial designs, clinical and therapeutic potential, and strategy of our product candidates, including but not limited to our expectations and beliefs around the safety and activity of CLN-081. Any forward-looking statements in this press release are based on management's current expectations and beliefs of future events, and are subject to known and unknown risks and uncertainties that may cause our actual results, performance or achievements to be materially different from any expressed or implied by the forward-looking statements. These risks include, but are not limited to, the following: uncertainty regarding the timing and results of regulatory submissions; success of our clinical trials and preclinical studies; risks related to our ability to protect and maintain our intellectual property position; risks related to manufacturing, supply, and distribution of our product candidates; risks related to the impact of COVID-19 affecting countries or regions in which we have operations or do business, including potential negative impacts on our employees, customers, supply chain and production as well as global economies and financial markets; the risk that any one or more of our product candidates, including those that are co-developed, will not be successfully developed and

commercialized; the risk that the results of preclinical studies or clinical studies will not be predictive of future results in connection with future studies; and success of any collaboration, partnership, license or similar agreements. These and other important risks and uncertainties discussed in our filings with the Securities and Exchange Commission, or SEC, including under the caption "Risk Factors" in our most recent Annual Report on Form 10-K and subsequent filings with the SEC, could cause actual results to differ materially from those indicated by the forward-looking statements made in this press release. While we may elect to update such forward-looking statements at some point in the future, we disclaim any obligation to do so, even if subsequent events cause our views to change. These forward-looking statements should not be relied upon as representing our views as of any date subsequent to the date of this press release. Moreover, except as required by law, neither Cullinan nor any other person assumes responsibility for the accuracy and completeness of the forward-looking statements included in this press release. Any forward-looking statement included in this press release speaks only as of the date on which it was made. We undertake no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise, except as required by law.
