

## Taiho Oncology and Cullinan Therapeutics Present Data on Zipalertinib in Patients with NSCLC with EGFR Mutations and Active Brain Metastases at the ESMO Congress 2025

October 12, 2025

**Princeton, N.J., Cambridge, Mass., Oct. 12, 2025** — Taiho Oncology, Inc., and Cullinan Therapeutics, Inc., today announced new data from the central nervous system (CNS) involvement cohort of the [REZILIENT2](#) study of zipalertinib, an oral epidermal growth factor receptor (EGFR) tyrosine kinase inhibitor, in patients with advanced or metastatic non-small cell lung cancer (NSCLC) harboring EGFR exon 20 insertion mutations (ex20ins) or uncommon non-ex20ins EGFR mutations and CNS involvement. Data will be presented at the European Society for Medical Oncology (ESMO) Congress 2025, as a mini oral presentation on October 19 during the “NSCLC metastatic” session from 8:30 to 10 a.m. CEST.

The mini oral presentation will highlight preliminary efficacy and safety data from the CNS involvement cohort of the ongoing parallel cohort Phase 2b REZILIENT2 trial of zipalertinib <sup>1</sup>.

Patients with locally advanced or metastatic NSCLC harboring EGFR ex20ins mutations represent a significant unmet medical need. An incidence of baseline brain metastases in EGFR ex20ins NSCLC patients ranging from 23% to 39% has been reported.<sup>2</sup> Patients with lung cancer with CNS involvement have a worse prognosis and require more aggressive therapy, including surgery and radiotherapy.

“Treatment options are limited for patients with NSCLC with EGFR mutations and active brain metastases,” said Helena A. Yu, MD, Thoracic Medical Oncologist, Memorial Sloan Kettering Cancer. “We are pleased to see that in approximately one-third of patients exposed to zipalertinib, a decrease in CNS lesions was observed. These preliminary results suggest the potential for zipalertinib to treat these patients, warranting future investigation.”

**Authors will report results from the REZILIENT2 study of zipalertinib against active CNS metastases in patients with NSCLC harboring EGFR ex20ins or other uncommon mutations<sup>1</sup>:**

### Summary of Preliminary Efficacy - by Investigator

As of the February 2025 data cutoff, 32 patients were enrolled in the CNS involvement cohort of the ongoing parallel cohort Phase 2b REZILIENT2 trial and received zipalertinib 100 mg orally twice daily. Patients received a median of 2 prior lines of therapy, and of all patients enrolled, 21 patients had ex20ins mutations and 13 patients had other uncommon mutations.

As of the data cutoff, zipalertinib demonstrated:

- In the Response Assessment in Neuro-Oncology for Brain Metastases (RANO-BM) criteria evaluable population with measurable CNS disease (n=16, including 3 patients with leptomeningeal disease (LMD), intracranial objective response rate was 31.3% including 1 intracranial complete response.
- In the same population, the intracranial disease control rate (iDCR) was 68.8% and the median intracranial duration of response (DOR) was 8.1 months.
- Measured in 29 of the cohort’s patients, preliminary systemic objective response rate (ORR) was 27.6% and median DOR was 7.6 months.
- Intracranial antitumor activity was found to be similar to its overall systemic anticancer activity in this cohort of patients.

### Summary of Preliminary Safety and Tolerability

Administered at 100 mg orally twice daily, zipalertinib was found to be well tolerated, with no new safety signals observed. Treatment-related adverse events of grade 3 or higher occurred in 8 patients (25%) and included anemia (n=3) and interstitial lung disease (n=2). There was one death due to interstitial lung disease.

### About REZILIENT2

REZILIENT2 is a Phase 2b clinical trial ([NCT05967689](#)), evaluating the safety and efficacy of zipalertinib in patients with locally advanced or metastatic NSCLC harboring ex20ins mutations or other uncommon/single or compound EGFR mutations. Patients are enrolled into one of four cohorts: Cohort A (“prior ex20ins treatment”), Cohort B (“first-line”), Cohort C (“active brain metastases”), and Cohort D (“other uncommon EGFR mutations”). Cohort C includes patients harboring EGFR ex20ins or other uncommon/single or compound EGFR mutations and CNS involvement. In this cohort, patients may or may not have had prior treatment for advanced disease. Patients are treated with oral zipalertinib 100 mg twice daily. The primary endpoint is ORR and

confirmed per investigator-assessed Response Evaluation Criteria in Solid Tumors (RECIST) v1.1 and the secondary endpoints include DOR, DCR, PFS, OS, intracranial efficacy by RANO-BM criteria, PK and safety.

### **About Zicalertinib**

Zicalertinib (development code: CLN-081/TAS6417) is an orally available small molecule designed to target activating mutations in EGFR. The molecule was selected because of its ability to inhibit EGFR variants with ex20ins mutations, while sparing wild-type EGFR. Zicalertinib is designed as a next generation, irreversible EGFR inhibitor for the treatment of a genetically defined subset of patients with non-small cell lung cancer. Zicalertinib has received Breakthrough Therapy Designation from the FDA. Zicalertinib is investigational and has not been approved by any health authority.

Zicalertinib is being developed by Taiho Oncology, Inc., its parent company, Taiho Pharmaceutical Co., Ltd., and in collaboration with Cullinan Therapeutics, Inc. in the U.S.

### **About Taiho Oncology, Inc.**

The mission of Taiho Oncology, Inc. is to improve the lives of patients with cancer, their families and their caregivers. The company specializes in the development and commercialization of orally administered anti-cancer agents for various tumor types. Taiho Oncology has a robust pipeline of small-molecule clinical candidates targeting solid-tumor and hematological malignancies, with additional candidates in pre-clinical development. Taiho Oncology is a subsidiary of Taiho Pharmaceutical Co., Ltd. which is part of Otsuka Holdings Co., Ltd. Taiho Oncology is headquartered in Princeton, New Jersey and oversees its parent company's European and Canadian operations, which are located in Baar, Switzerland and Oakville, Ontario, Canada.

### **About Cullinan Therapeutics**

[Cullinan Therapeutics, Inc.](#) (Nasdaq: CGEM) is a biopharmaceutical company dedicated to creating new standards of care for patients. Cullinan has strategically built a diversified portfolio of clinical-stage assets that inhibit key drivers of disease or harness the immune system to eliminate diseased cells in both autoimmune diseases and cancer. Cullinan's portfolio encompasses a wide range of modalities, each with the potential to be best and/or first in class. Anchored in a deep understanding of oncology, immunology, and translational medicine, we create differentiated ideas, identify the most appropriate targets, and select the optimal modality to develop transformative therapeutics across a wide variety of autoimmune and cancer indications. We push conventional boundaries from candidate selection to differentiated therapeutic, applying rigorous go/no go criteria at each stage of development to fast-track only the most promising molecules to the clinic and, ultimately, commercialization. With deep scientific expertise, our teams exercise creativity and urgency to deliver on our promise to bring new therapeutic solutions to patients. ### **Forward Looking Statements**

This press release contains forward-looking statements within the meaning of The Private Securities Litigation Reform Act of 1995. These forward-looking statements include, but are not limited to, express or implied statements regarding the company's beliefs and expectations regarding our plans regarding future data presentations, the clinical development and regulatory filing plan and timeline of zicalertinib, the safety and efficacy profile of zicalertinib and its potential to address unmet medical need, and other statements that are not historical facts. The words "believe," "continue," "could," "estimate," "expect," "intends," "may," "plan," "potential," "project," "pursue," "will," and similar expressions are intended to identify forward-looking statements, although not all forward-looking statements contain these identifying words.

Any forward-looking statements in this press release are based on management's current expectations and beliefs of future events and are subject to known and unknown risks and uncertainties that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. These risks include, but are not limited to, the following: uncertainty regarding the timing and results of regulatory submissions; the risk that any NDA or other regulatory submissions we may file with the United States Food and Drug Administration or other global regulatory agencies are not cleared on our expected timelines, or at all; the success of our clinical trials and preclinical studies; the risks related to our ability to protect and maintain our intellectual property position; the risks related to manufacturing, supply, and distribution of our product candidates; the risk that any one or more of our product candidates, including those that are co-developed, will not be successfully developed and commercialized; the risk that the results of preclinical studies or clinical studies will not be predictive of future results in connection with future studies; and the success of any collaboration, partnership, license or similar agreements. These and other important risks and uncertainties discussed in our filings with the Securities and Exchange Commission, including under the caption "Risk Factors" in our most recent Annual Report on Form 10-K and subsequent filings with the SEC, could cause actual results to differ materially from those indicated by the forward-looking statements made in this press release. While we may elect to update such forward-looking statements at some point in the future, we disclaim any obligation to do so, even if subsequent events cause our views to change, except to the extent required by law. These forward-looking statements should not be relied upon as representing our views as of any date subsequent to the date of this press release. Moreover, except as required by law, neither the company nor any other person assumes responsibility for the accuracy and completeness of the forward-looking statements included in this press release. Any forward-looking statement included in this press release speaks only as of the date on which it was made.
